

Global Scrap Metal Trading

Status update 21.05.2025

Agenda

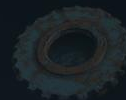

01. Feedback and bugs

02. Additionally requested features

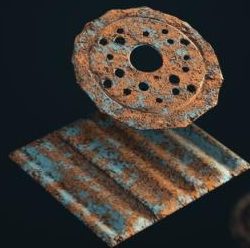

03. Ongoing Client Reachouts

GSMT
Global Scrap Metal Trading

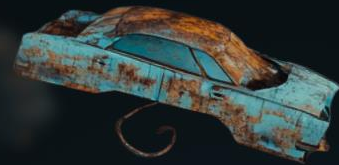

Feedback and bugs

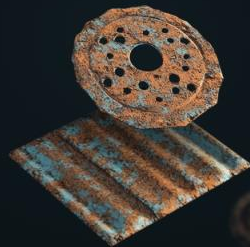

Done but not yet pushed to production

- ✓ **Google authorization**
- ✓ **Editing listings:** When editing a listing and removing the price, saving the listing sets the price to 0.00 instead of showing an error for an empty price field. (This only happens when editing, not when creating a listing.)
- ✓ **Double message issue:** If an error occurs during listing creation and is then corrected, the system shows both the old error and the new success message.
- ✓ **Tab checkmarks when editing:** When editing a listing, all tab checkmarks reset to grey until a change is made. Ideally, previously completed tabs should immediately show green checkmarks when editing.
- ✓ **Pre-populated fields via Product Options:** When creating a listing from the “Product Options > Create Listing” button, dimensions and density don’t pre-populate as they should. Pre-population works fine when creating a listing on the My Listings page, though.

**Additionally requested
features**
